3. Setelah berhasil akan muncul pilihan cara bermain kahoot, pilih mode “Teach” jika digunakan saat sedang dalam Virtual Classroom (Dosen share screen kahoot nya sehingga mahasiswa dapat melihat soalnya melalui layar virtual classroom). Sedangkan mode “Assign” digunakan untuk pembelajaran mandiri (Dosen tidak share screen, mahasiswa dapat melihat soalnya secara mandiri di layar kahoot masing-masing.)

4. Setelah memilih mode permainan, berikutnya akan muncul opsi permainan, untuk virtual classroom disarankan menggunakan mode “Classic” agar setiap mahasiswa dapat bermain secara mandiri.

5. Ada beberapa opsi permainan yang dapat diatur oleh dosen agar permainan menjadi lebih menarik.
- a. Friendly Nickname Genarator -> jika di On kan, maka nickname mahasiswa akan di generate otomatis oleh sistem untuk menghindari nama-nama yang tidak sopan (karena ketika mahasiswa masuk ke dalam permainan, mereka akan dapat membuat nickname mereka secara mandiri)
 - b. Lobby Music -> jika diganti maka music akan berubah sesuai yang kita inginkan.
 - c. Randomize order of question -> Jika di On kan, maka urutan soal yang telah kita buat akan diacak, sehingga jika ada mahasiswa yang sudah pernah mengikuti Kahoot ini maka mereka tidak akan mudah hafal dengan soalnya

- e. Show minimized intro instruction -> Jika di On kan, maka akan memunculkan instruksi di awal
- f. 2-Step Join -> Jika di On kan maka saat mahasiswa hendak join, maka selain harus menginputkan kode ruangan, juga harus mencocokkan symbol yang muncul di layar dosen agar dapat bergabung. Hal ini digunakan untuk mencegah adanya mahasiswa luar yang menyusup bergabung dalam permainan.
- g. Automatically move through question -> Jika di On kan, maka setiap pergantian soal akan otomatis berganti tanpa dosen harus klik tombol Next.
- h. Rejoin after every game -> Jika di On kan, maka setelah game selesai mahasiswa harus melakukan join ulang jika ingin bermain kembali.
